# Overview of the basic program → Your name

Easy 1 minute

38380 users solved this problem. Latest completion was about 1 hour ago.

Write a program that prints the string "My name is " followed by your name like in the output example. All words in this string must be separated by a single space.

Output example

My name is John

Report a typo

Write a program

[Code Editor](#) [IDE](#)

Python

```
1 print("My name is John")
2
```

✓ Correct.
