

Scanning the input → Printing strings in the same order

Medium 4 minutes

15660 users solved this problem. Latest completion was about 1 hour ago.

Write a program that reads four words and outputs them in the same order, each in a new line.

Report a typo

Sample Input 1:

```
Hello
Java
Future programmer
```

Sample Output 1:

```
Hello
Java
Future
programmer
```

Write a program

[Code Editor](#) [IDE](#)

Java

```
1 import java.util.Scanner;
2 class Main {
3     public static void main(String[] args) {
4         Scanner scanner = new Scanner(System.in);
5
6         String line1 = scanner.nextLine();
7         String line2 = scanner.nextLine();
8         String word1 = scanner.next();
9         String word2 = scanner.next();
10
11         System.out.println(line1);
12         System.out.println(line2);
13         System.out.println(word1);
14         System.out.println(word2);
15     }
16 }
17
```

✓ **Correct.**
