

Java → Object-oriented programming → Inheritance and polymorphism → [Inheritance](#)

Inheritance → Access members inside child classes

Easy 1 minute

2400 users solved this problem. Latest completion was about 17 hours ago.

Which of the following modifiers do you need to use if class members (fields and methods) should be accessible inside child classes and not accessible in the outside world?

Report a typo

Select one option from the list

- ☐ protected for fields, private for methods
- ☐ public for fields and methods
- ☐ private for fields and methods
- ☐ public for fields, protected for methods
- ☐ private for methods, protected for fields
- ☐ protected for fields and methods

Correct.
