

Java → Basic syntax and simple programs → Control flow statements → Ternary operator

Ternary operator → Write a ternary operator

Medium 1 minute ?

12306 users solved this problem. Latest completion was about 18 hours ago.

How can you rewrite the following conditional statement using a ternary operator?

```
1  if (a + b == c) {
2      d = c;
3  } else {
4      d = 10;
5  }
```

All variables are integers.

Report a typo

Select one option from the list

- ☐ int d = a + b != c ? 10 : c;
- ☐ int d = c : 10 ? a + b == c;
- ☐ int d = a + b == c ? 10 : c;
- ☐ int d = a + b == c ? c : a + b;

Correct.
