

Python → Modules and packages → [Load module](#)

Load module → Good importing practices

 Medium  1 minute 

8581 users solved this problem. Latest completion was about 1 hour ago.

Choose all the options that are considered a good practice.

 Report a typo

↵ Select one or more options from the list

- ☐ Importing every module just before the code that uses it.
- ☒ Putting all the imports at the top of a script.
- ☐ Using `from module import *` idiom.
- ☒ Importing only one module in a single statement.
- ☐ Importing several modules in a single statement.

✓ Correct.
