

Python → Errors and exceptions → [Exception handling](#).

Exception handling_ → Matching problem

Easy 1 minute

971 users solved this problem. Latest completion was 2 days ago.

Match the keywords of try-except block with their descriptions:

Report a typo

Match the items from left and right columns

else	will only be executed if there were no exceptions	↑	↓
finally	will be always executed	↑	↓
try	is always executed first	↑	↓
except	will be executed if there was a matching exception in try block	↑	↓

Correct.
