3577 users solved this problem. Latest completion was about 22 hours ago.

In which cases, `StringBuilder` is better than a `String`?

 Report a typo

✓ Select one or more options from the list

- ☒ We need to remove elements from a string multiple times.
- ☐ We need to invoke methods `length` and `charAt` multiple times.
- ☒ We need to concatenate multiple strings into a single one.
- ☐ We need to create a simple string and display it to the standard output.

✓ Correct.
