

Java → Object-oriented programming → Classes and objects → Annotations

Annotations → Mark a field using @FieldDescription

Hard 1 minute

2289 users solved this problem. Latest completion was about 12 hours ago.

An external annotation `@FieldDescription` has one string element named `text`. The element has a default value (the empty string). Select all correct ways to mark a field using this annotation.

Report a typo

Select one or more options from the list

- ☐ `@FieldDescription({"some text"})`
- ☐ `@FieldDescription("some text")`
- ☒ `@FieldDescription(text = "some text")`
- ☐ `@FieldDescription(value = "some text")`
- ☒ `@FieldDescription`

Correct.
