1452 users solved this problem. Latest completion was 29 minutes ago.

Select all correct statements.

 Report a typo

 Select one or more options from the list

- ☒ Different sorting algorithms have different time efficiency.
- ☐ Only string, integer and floating-point number arrays can be sorted.
- ☐ All sorting algorithms compare array elements.
- ☒ Sorting algorithms can sort array elements in ascending or descending order.
- ☒ If we've sorted an array it should have the same number of elements as the input.

 Correct.
