

Java → Basic syntax and simple programs → Control flow statements → Ternary operator

Ternary operator → What is the result

Easy 1 minute

10866 users solved this problem. Latest completion was about 18 hours ago.

You are given two variables:

```
1 | int x = 15, y = 20;
```

What is the result of the following statement `(x < y) ? (y + x) : (y - x)`?
