

Python → Modules and packages → [Load module](#)

Load module → Capitalize all words

Medium 1 minute

4787 users solved this problem. Latest completion was about 3 hours ago.

Write a program that takes a string, capitalizes all words in it and then prints the result. Use [capwords](#) function from the *string* module.

The string is already defined.

Report a typo

Sample Input 1:

a aaaa aaaaaaaaa

Sample Output 1:

A Aaaa Aaaaaaaaa

Write a program

[Code Editor](#) [IDE](#)

Python

```
1 # place `import` statement at top of the program
2 from string import capwords
3
4 # don't modify this code or the variable may not be available
5 input_string = input()
6
7 # use capwords() here
8 print(capwords(input_string))
9
```

✓ Correct.
