Alice is going to the store and she’s writing a list of what she should buy. First, she didn’t want to buy many bananas but then she suddenly changed her mind. How can you help Alice and correctly update the value of `bananas` in the following `shopping_list`?

```
1 | shopping_list = {'bananas': 5, 'oranges': 3, 'yogurt': 2, 'chicken breasts': 3, 'olive oil': 1}
```

Report a typo

Select one option from the list

- ☐ `shopping_list.bananas = 10`
- ☐ `shopping_list['bananas'] = 10`
- ☐ `shopping_list[bananas] = 10`
- ☐ `bananas['shopping_list'] = 10`

✓ Correct.
