

Python → Functions → [Default arguments](#)

Default arguments → Favorable default

Medium 1 minute

3689 users solved this problem. Latest completion was about 1 hour ago.

Write a short function `code` that will print out this message:

`We code in {language}`

Set "Python" as a default value to the `language` parameter.

You don't need to call the function, you only need to implement it.

Report a typo

Write a program

[Code Editor](#) [IDE](#)

```
1 def code(language='Python'):
2     print(f"We code in {language}")
3
```

Python

✓ Correct.
