

Java → Object-oriented programming → Serialization → Custom serialization

Custom serialization → Fix the bank account

Easy 1 minute

1072 users solved this problem. Latest completion was about 17 hours ago.

Here's a class:

```
1 public class BankAccount implements Serializable {
2     String name;
3     transient String accountNumber;
4
5     private void writeObject(ObjectOutputStream oos) throws Exception {
6         _____
7         String encryptAccNumber= encrypt(accountNumber);
8         oos.writeObject(encryptAccNumber);
9     }
10 }
```

Which of the following lines should be instead of the blank one?

Report a typo

Select one option from the list

- ☐ oos.defaultWriteObject();
- ☐ oos.defaultSerialize()
- ☐ defaultWriteObject();
- ☐ defaultSerialize()

Correct.
