

Python → Collections → Dictionary

Dictionary → Update info

Medium 2 minutes

2493 users solved this problem. Latest completion was 23 minutes ago.

Let's say you have a dict with children's names and professions they would like to have when they grow up:

```
1 | children = {'Emily': 'artist', 'Adam': 'astronaut', 'Nancy': 'programmer'}
```

But what if someone's choice has changed? Say, Emily now wants to be a musician. Update the dict and print the new version.

Write a program

[Code Editor](#) [IDE](#)

```
1 # please work with the variable children
2 # update the dict and print it
3 children['Emily'] = 'musician'
4 print(children)
5
```

Python

✓ Correct.
