

Python → Data types and operations → Basic data types and operations → [Type casting](#).

Type casting_ → A loooong type conversion

Medium 1 minute

10735 users solved this problem. Latest completion was 39 minutes ago.

Look at some type conversions below and find out what will be in the output:

```
1 | n = 2.777
2 | print(str(float(int(n))))
```
