Sep and end arguments of print →

Several lines, one print

Medium 1 minute

2798 users solved this problem. Latest completion was 19 minutes ago.

Write a snippet that will print the following lines using only one `print()` statement.

The lines:

*Night, square, apothecary, lantern,
Its meaningless and pallid light.
Return a half a lifetime after –
All will remain. A scapeless rite.*

Write a program

[Code Editor](#) [IDE](#)

Python

```
1 line1 = "Night, square, apothecary, lantern,"
2 line2 = "Its meaningless and pallid light."
3 line3 = "Return a half a lifetime after – "
4 line4 = "All will remain. A scapeless rite."
5
6 # your one print() statement here
7 print(line1, line2, line3, line4, sep='\n')
8
```

✓ Correct.
