

Python → Control flow statements → [Elif statement](#)

Elif statement → Intervals

Easy 1 minute

4520 users solved this problem. Latest completion was about 1 hour ago.

Match the value of `var` with the output of the following program:

```
1 if var >= 300:
2     print("out of limit")
3 elif (var >= 100) and (var < 200):
4     print("the second interval")
5 else:
6     if var < 100:
7         print("the first interval")
8     else:
9         print("the third interval")
```

Report a typo

Match the items from left and right columns

88	the first interval	↑	↓
101	the second interval	↑	↓
276	the third interval	↑	↓
300	out of limit	↑	↓

Correct.
