Imagine you are writing a program that will give a prediction for users. Say, you intend to do so based on a number they enter. Write a program that reads a number and prints the sum of its digits.

An input number and hence the output number are both positive.

Report a typo

Sample Input 1:

309

Sample Output 1:

12

Sample Input 2:

10931

Sample Output 2:

14

Write a program

[Code Editor](#) [IDE](#)

Python

```
1 # put your code here
2 def sum_number(numbers):
3     calculate = 0
4     for i in numbers:
5         calculate += int(i)
6     return calculate
7 example = sum_number(input())
8 print(example)
9
```

✓ Correct.
