## Statements # Comprehension

Select all correct statements about jump search.

 Report a typo

 Select one or more options from the list

- ☐ The algorithm cannot be used to search in descending sorted arrays.
- ☒ The length of the last block may be less than the others.
- ☒ In some cases, the algorithm can find an element by performing only a single comparison.
- ☐ The time complexity is  $O(\sqrt{n})$  if the jump length is  $n / 2$  where  $n$  is the size of the input array.

✓ Correct.
