Why do we need variables? What is the main reason to use them in programs?

📄

Report a typo

↵ Select one option from the list

- ☐ We need variables to make code more complex and redundant.
- ☐ We must use variables when calculating really large numbers.
- ☐ We use variables to store values and access them by name later.
- ☐ Variables typically make code less comprehensible.
- ☐ As per code style guidelines, we use variables to have more lines of code.

✓ Correct.
