

Python → Control flow statements → [Else statement](#)

Else statement → Leap Year

 Medium  5 minutes 

9821 users solved this problem. Latest completion was about 1 hour ago.

Write a program that checks if a year is leap.

A year is considered leap if it is divisible by 4 and NOT divisible by 100, or if it is divisible by 400. So, 2000 is leap and 2100 isn't.

Output either "Leap" or "Ordinary" depending on the input.

 Report a typo

Sample Input 1:

2100

Sample Output 1:

Ordinary

Sample Input 2:

2000

Sample Output 2:

Leap

 Write a program

[Code Editor](#)

[IDE](#)

Python

```
1 # put your python code here
2 year = int(input())
3 if 1900 <= year <= 3000:
4     if ((year % 4 == 0 and year % 100 != 0) or year % 400 == 0):
5         print("Leap")
6     else:
7         print("Ordinary")
8
```

✓ Correct.
