

Java → Basic syntax and simple programs → Strings → [StringBuilder](#)

# StringBuilder → Statements

Easy 20 seconds

1393 users solved this problem. Latest completion was 1 day ago.

Select one correct statement about `String` and `StringBuilder`.

Report a typo

Select one option from the list

- ☐ When we need a lot of concatenations, `String` and `StringBuilder` will work almost equally fast.
- ☐ When we need a lot of concatenations, `StringBuilder` will work faster than a `String`.
- ☐ When we need a lot of concatenations, `String` will work faster than a `StringBuilder`.

Correct.
