# Split and join → String tricks

Medium 1 minute

3233 users solved this problem. Latest completion was about 4 hours ago.

Examine the code and fix the mistakes so that the `join()` method works.

Report a typo

Write a program

[Code Editor](#)    [IDE](#)

```
1 random_numbers = ['1', '22', '333', '4444', '55555']
2 print("\n".join(random_numbers))
3
```

Python

✓ Correct.
