Prim's algorithm → An extra step

Easy 1 minute

234 users solved this problem. Latest completion was 1 day ago.

What step is **not** included to the Prim's algorithm?

Report a typo

Select one option from the list

- ☐ Choosing any arbitrary node as a root node and growing the tree by one edge.
- ☐ Initialization of a tree with a starting node.
- ☐ Removing all loops and parallel edges.
- ☐ Checking outgoing edges and selecting the one with the least cost.

✓ Correct.
