# Anonymous classes → Find a correct syntax

 Easy 1 minute ?

Here's an interface:

```
1 interface AnInterface {
2
3     void method();
4 }
```

Select the correct syntax for creating an anonymous class.

a)

```
1 new AnInterface {
2
3     @Override
4     public void method() {
5         // do something
6     }
7 };
```

b)

```
1 AnInterface() {
2
3     @Override
4     public void method() {
5         // do something
6     }
7 };
```

c)

```
1 new AnInterface() {
2
3     @Override
4     public void method() {
5         // do something
6     }
7 };
```

d)

```
1 new AnInterface() {{
2
3     @Override
4     public void method() {
5         // do something
6     }
7 }};
```

 Report a typo

✓ Select one option from the list

- ☐ a
- ☐ b
- ☐ c
- ☐ d

✓ Correct.
