You have a class with one private constructor:

```
1 package org.demo.example;
2
3 public class MyClass {
4
5     private MyClass() { }
6
7     private void method1() { }
8
9     public void method2() { }
10 }

```

Select all correct statements.

Report a typo

Select one or more options from the list

- ☐ You cannot create instances of **MyClass** using the keyword **new** inside the **method1**
- ☒ You cannot create instances of **MyClass** using the keyword **new** inside classes that belong to other packages.
- ☒ You can create instances of **MyClass** using the keyword **new** inside the **method2**
- ☐ You can create instances of **MyClass** using the keyword **new** inside public classes that belong to the same package.

✓ Correct.
