# Program execution → How it happens

 Medium  1 minute 

14156 users solved this problem. Latest completion was about 2 hours ago.

Below is a description of a Python interpretation process, divided into smaller steps. Sort these steps in the correct order (from 'you write code' to 'everything works!'), so together they explain what really happens during Python interpretation.

 Report a typo

 Put the items in the correct order

|                                                        |              |              |
|--------------------------------------------------------|--------------|--------------|
| You write code.                                        | <div>↑</div> | <div>↓</div> |
| The compiler turns your source code into byte code.    | <div>↑</div> | <div>↓</div> |
| The code goes to Python Virtual Machine.               | <div>↑</div> | <div>↓</div> |
| Virtual Machine executes code instructions one by one. | <div>↑</div> | <div>↓</div> |
| Everything works!                                      | <div>↑</div> | <div>↓</div> |

✓ Correct.
