Split and join → mixedCase

 Hard  6 minutes 

1919 users solved this problem. Latest completion was about 4 hours ago.

Convert a text into `lowerCamelCase`, or `mixedCase`.

The input format:

A lowercased word or several words separated by spaces.

The output format:

Print this text stylized as `mixedCase`, that is, the first word should be in lowercase and all other words – capitalized.

 Report a typo

Sample Input 1:

camel

Sample Output 1:

camel

Sample Input 2:

lower camel case

Sample Output 2:

lowerCamelCase

 Write a program

[Code Editor](#)

[IDE](#)

```
1 words = input().split(maxsplit=1)
2 first_word = words[0].lower()
3 other_word = ''.join(words[1:]).title().replace(" ", "")
4 print(first_word + other_word)
5
```

Python

✓ Correct.
