

Java → Object-oriented programming → Classes and objects → [Package](#)

# Package → Statements

 Medium    1 minute   

2288 users solved this problem. Latest completion was 38 minutes ago.

Select all true statements about packages in Java.

 Report a typo

↵ Select one or more options from the list

- ☐ A package can contain two classes with the same name.
- ☒ A package can contain a single class with a unique name in this package.
- ☒ A package can be empty.
- ☒ A package can contain another package.

✓ Correct.
