

Python → Data types and operations → Strings → Quotes and multi-line strings

Quotes and multi-line strings → A pyramid!

Medium 2 minutes

17779 users solved this problem. Latest completion was about 1 hour ago.

Write a program that prints a 4-line string, containing:

- at the first line – one single quote
- at the second line – two single quotes with one double quote inside
- at the third line – five alternating single and double quotes, starting with a single quote
- at the fourth line – seven alternating single and double quotes, starting with a single quote

So, the output should look like this:

```
1  '
2  "'
3  '"'"
4  '"'''''
```

Hint

Report a typo

Write a program

[Code Editor](#) [IDE](#)

```
1  print("""
2  '
3  '"'"
4  '"''''')
5
```

Python

✓ Correct.
