# Taking input → Input() function

Easy 21 seconds

9474 users solved this problem. Latest completion was 18 minutes ago.

What does the *input()* function do?

Report a typo

Select one option from the list

- ☒ Reads some data from the user and returns it in a program as a string.
- ☐ Reads some data from the user and returns it in a program as a float number.
- ☐ Reads some data from the user and prints it.
- ☐ Reads some data from the user and returns it in a program as an integer number.

✓ Correct.
