Avoiding bad comments → Improvement Choices

Medium 1 minute

12652 users solved this problem. Latest completion was about 2 hours ago.

Generally, comments are a great idea, but now it’s time to improve some of them.
Match the examples below with the corresponding fixes.

Report a typo

↩ Match the items from left and right columns

a = input() # the first variable from user input is name	Change the name of the variable	↑	↓
name, surname = "Ned", "Stark" # assigning name to name and surname to surname	Avoid commenting obvious things	↑	↓
age += 20 # making "age" 20 years less	Fix the contradiction	↑	↓
student = "Mark Smith" # we give this variable the value "Mark Smith" because we want to be able to work with it later	Keep comments concise	↑	↓

✓ Correct.
