Introduction to Python → Hello, Python

Easy 1 minute

64201 users solved this problem. Latest completion was about 1 hour ago.

Here is a simple one-line Python program that prints a text. Copy it to the text area below and then click the **Run** button (or **Check** button if you use an IDE). Our server will verify whether the program is correct and will tell you the result.

```
1 | print("Learn Python to be great!")
```

Now, you do not need to understand how the program works, just enjoy it! :)

Report a typo

Write a program

[Code Editor](#) [IDE](#)

```
1 print("Learn Python to be great!")
2
```

Python

✓ Correct.

That's an awesome solution! What do you think about showing it off? [Post it to Solutions](#) so other learners can enjoy it too.

FEEDBACK

Code quality ? : About your code quality level ↓

Passed. Congratulations! It is your first Python program that really works.
