

Python → Functions → [Arguments](#)

Arguments → Distinction

Easy 1 minute

3686 users solved this problem. Latest completion was about 14 hours ago.

What is the difference between arguments and parameters?

Report a typo

Select one option from the list

- ☐ Parameters appear in a function definition, while arguments are the values we pass during a call.
- ☐ Order is important only for arguments, as opposed to parameters.
- ☐ We specify arguments when declaring a function, whereas parameters are used in function calls.
- ☐ Arguments and parameters mean the same thing, these words are synonyms.

Correct.
