You have the following project structure:

```
1  | oscars/  
2  |     __init__.py  
3  |     two_nineteen/  
4  |         __init__.py  
5  |         bohemian_rhapsody.py  
6  |         greenbook.py  
7  |         favourite.py  
8  |         blackpanther.py  
9  |     two_eighteen/  
10 |         __init__.py  
11 |         shapeofwater.py  
12 |         darktimes.py
```

What clarification should be added into `__init__.py` if we want to use `from oscars.two_nineteen import *` and import the last two modules only?

Report a typo

Enter a short text

__all__=["favourite", "blackpanther"]

✓ Correct.
