Java → Basic syntax and simple programs → Strings → String

String → Extracting a substring

📊 Medium   🕐 5 minutes   ❓

Write a program that reads a string and two integer numbers. These two numbers are representing a range that includes them both. Print the substring enclosed in this range. Both numbers are always greater than or equal to 0 and less than the string length.

📄 Report a typo

Sample Input 1:

```
Java
0 2
```

Sample Output 1:

```
Jav
```

↓ Write a program

Code Editor   IDE

```java
 1  import java.util.*;
 2
 3  class Main {
 4      public static void main(String[] args) {
 5          // put your code here
 6          Scanner scanner = new Scanner(System.in);
 7          String inputString = scanner.nextLine();
 8          int first = scanner.nextInt();
 9          int second = scanner.nextInt();
10          System.out.println(inputString.substring(first, second + 1));
11          scanner.close();
12      }
13  }
14
```

✓ Correct.

That's an awesome solution! What do you think about showing it off? **Post it to Solutions** so other learners can enjoy it too.
