Create module → Common mistakes

📶 Medium   🕐 1 minute   ❓

Below are some common mistakes a learner can make while defining or importing modules. What happens when you make each mistake?

1.

```
1    # module.py
2
3    import module
4
5    print("Hello!")
```

2.

```
1    # math.py
2
3    from math import pi
```

3.

```
1    # module_1
2
3    name = "John"
4    print("You shouldn't print this!")
```
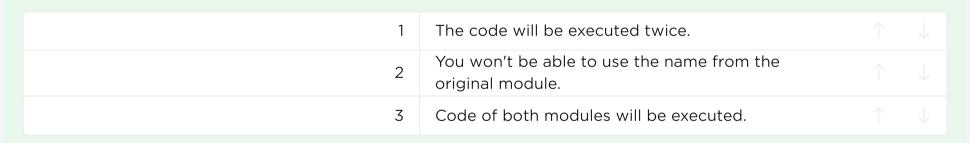

```
1    # module_2
2
3    from module_1 import name
4
5    print("Hello,", name)
```

📄 Report a typo

↕ Match the items from left and right columns

	1	The code will be executed twice.	↑	↓
	2	You won't be able to use the name from the original module.	↑	↓
	3	Code of both modules will be executed.	↑	↓

✓ Correct.
