Initialization blocks → Static initialization blocks

▪ Easy   ⏱ 1 minute   ⊙

What are the features of **static initialization blocks**?

🗐 Report a typo

⤓ Select one or more options from the list

☐ blocks execute when an object has already been initialized by a constructor

☑ a class can have multiple static blocks which will execute in the order that they appear in the source code

☐ static initialization blocks can access non-static fields and methods of a class

☑ **static { }** defines a new static initialization block

✓ Correct.
