Python → Simple programs → Taking input

Taking input → Test

📊 Medium　🕐 1 minute　❓

Let's see how it works. Copy the following code and paste it below. Then **change** one of the lines so that the program would print any data the user inputs without performing any operations on them.

```
1   data = ...
2   print(data)
```

📄 Report a typo

Sample Input 1:

```
10
```

Sample Output 1:

```
10
```

↓ Write a program

Code Editor　　　　IDE

```python
1   # put your python code here
2   data = input()
3   print(data)
4
```

✓ Correct.

That's an awesome solution! What do you think about showing it off? **Post it to Solutions** so other learners can enjoy it too.

1326 users liked this problem. **153** didn't like it. **What about you?**
