Java → Basic syntax and simple programs → Methods → Overloading

Overloading → What does the code output

▮ Easy   🕐 1 minute   ❓

Given four overloaded methods:

```
1    public static void method(short s) {
2        System.out.println("short");
3    }
4
5    public static void method(byte b) {
6        System.out.println("byte");
7    }
8
9    public static void method(int i) {
10
0        System.out.println("int");
1
1    }
1
2
1
3    public static void method(long l) {
1
4        System.out.println("long");
1
5    }
```

Here is an invocation:

```
1    method(10);
```

What does the code output? Enter a string.

🗎 Report a typo

↓ Enter a short text

int	▲
	▼

✓ Correct.
