Java → Object-oriented programming → Classes and objects → Constructor

Constructor → Default constructor

▫ Easy   ⏱ 28 seconds ⓘ

You have the class **SomeClass** without any constructors.

```
1    class SomeClass {
2        int someField = 10;
3    }
```

How can we create an instance of the class?

🗐 Report a typo

↓ Select one option from the list

○ SomeClass instance = new SomeClass();

○ SomeClass instance = SomeClass.defaultConstructor();

○ It's impossible.

○ SomeClass instance = new SomeClass(10);

✓ Correct.
