Python → Object-oriented programming → Methods

Methods → Open door policy

.ıl Easy   ⏱ 1 minute   ⍰

How can you call the `open_door` method of the class `Door` ? If there are several options, write one of them.

```
1    class Door:
2        def open_door(self):
3            print("Door open")
4
5    door = Door()
```

🗏 Report a typo

↧ Enter a short text

Door.open_door(door)

✓ Correct.
