Imagine that you have a package `"music"` with three subpackages: `"rock"`, `"jazz"` and `"classical"`. Each subpackage has 3 modules: `authors.py`, `epoques.py` and `tones.py`. How can we import the function `of_the_18th_century` from the classical authors' module?

🗐 Report a typo

↧ Enter a short text

from music.classical.authors import of_the_18th_century

✓ Correct.
