Python → Iterators and generators → Custom generators

Custom generators → Letters of a word

📊 Medium   🕐 2 minutes   ❔

Define a generator `letters` that would generate letters from a given word one by one.

You don't have to handle input or print anything.

🖹 Report a typo

Sample Input 1:

```
python
```

Sample Output 1:

```
p
y
t
h
o
n
```

↓ Write a program

Code Editor   IDE

```Python
1  def letters(word):
2      for character in word:
3          yield character
4
5  example = letters('python')
6
```

✓ Correct.
