Python → Object-oriented programming → Class instances

Class instances → **Movie night**

▪ Medium   ◷ 4 minutes   ⓘ

Write the class `Movie` and define the class constructor with such parameters as the `title`, `director`, and the `year` of release.

In the corresponding variables defined below, create such objects as the "Titanic" (James Cameron, 1997), "Star Wars" (George Lucas, 1977), and "Fight Club" (David Fincher, 1999).

▤ Report a typo

⌑ Write a program

Code Editor   IDE

```python
1  class Movie:
2      # create class here
3      def __init__(self, title, director, year):
4          self.title = title
5          self.director = director
6          self.year = year
7
8
9  # objects of the class Movie
10 titanic = Movie('Titanic', 'James Cameron', 1997)
11 star_wars = Movie('Star Wars', 'George Lucas', 1977)
12 fight_club = Movie('Fight Club', 'David Fincher', 1999)
13
```

✓ Correct.
