Java → Basic syntax and simple programs → Strings → String

String → Comparing strings ignoring whitespaces

📊 Medium   🕐 5 minutes   ⊘

Write a program that reads two lines and compares them without whitespaces. The program should print **true** if both lines are equal, otherwise – **false**.

📄 Report a typo

Sample Input 1:

```
  string
str ing
```

Sample Output 1:

```
true
```

Sample Input 2:

```
string
my string
```

Sample Output 2:

```
false
```

↳ Write a program

Code Editor   **IDE**

```java
                                                                                Java
1   import java.util.*;
2
3   class Main {
4       public static void main(String[] args) {
5           // put your code here
6           Scanner scanner = new Scanner(System.in);
7
8           String inputString1 = scanner.nextLine().replace(" ", "");
9           String inputString2 = scanner.nextLine().replace(" ", "");
10          System.out.println(inputString1.equalsIgnoreCase(inputString2));
11          scanner.close();
12      }
13  }
14
```

✓ Correct.

That's an awesome solution! What do you think about showing it off? **Post it to Solutions** so other learners can enjoy it too.
